FTCC WIRELESS NETWORK INFORMATION

FTCC WIRELESS IS HERE

Phase I - Effective 3/2/09
Wireless is available in most buildings on the FTCC main campus, however, complete indoor coverage is not guaranteed at this time. Indoor coverage may vary based on the construction of the building you are in and users may experience some "bleed-through" coverage near windows, doors, and main lobbies of buildings.

Phase II
MIS will provide additional access points within buildings (hallways, lounges, lobbies, etc) to help clear up problem areas.

Phase III
MIS will bring on board Spring Lake Campus and Horticulture Educational Center.

Please remember the wireless network is a convenient supplement to the FTCC wired network infrastructure and is not a replacement for your existing network connectivity in your offices, computer labs, and classrooms.

Using Wireless

For most users, accessing the wireless network is as easy as launching a web browser and logging on. However, if you do need assistance we have included some general instructions for setting up, and instructions for logging on.

- Users can be currently enrolled students, faculty, and staff.

- You must use your User ID (same as for Web Advisor) and Password (initially birth date, MMDDYY, then you are required to change it) to complete login.

- When logging in you are required to read all of the "Acceptable Use Guidelines" and "Agree" to them. You are responsible for the contents, and your access can be terminated if the guidelines are not followed.

- Logged in <u>sessions are limited to 4 hours</u>. After time has expired you will be logged off WITHOUT warning.

FTCC **Acceptable Use Guidelines** for the Wireless Network are located in the Administrative Procedures Manual, Section I-23.10.5.

- All users of the FTCC Wireless Network must read and accept the guidelines before completing a login.

Setup Guides
    These setup guides are provided as general information for the following operating systems to assist you with setting up the wireless adapter on a laptop. The pictures may vary due to frequent version upgrades but will give you a general idea of what you are looking for.

- Windows XP
- Windows Vista
- Mac OS X

Login Instructions

- Windows XP

Note: If you are having problems logging in to the wireless network, you may need to check the setup guides or users manual for assistance.
